Product Anatomy

Motor run capacitors features:

- ◆Non induction winding structure of metallic polypropylene membrane.
- ♦ It is small in bulk, has long life-span and good self-healing characteristic.
- ♦ High insulating resistance, little temperature changing inside, excellent stability of capacitance.
- ◆Non-toxic and non-leaking,profit environmental protection.

Usages:

- \blacklozenge Suitable for starting and operating 50Hz(60Hz)AC single–phase electromotor.
- ♦ Widely used as the start-up and running capacitor that is special for micro water pump, cleaning machine, washing machine, and single-phase household electrical appliances.

Motor run capacitor alternate design include the followings:

- ♦ Use round plastic shell, and insulation sealed lid for sealing, plastic lid for sealing or resin for sealing.
- ♦Flat bottom or fixing stud M8*12
- ◆Fasten terminals,Lug,wire,cable.
- ♦Plastic can,ABS,PC.
